Duration	10 mins 36 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

- a. Linear search ✓
- b. Hash search
- c. Both (1) & (3)
- d. Binary search

Question **2**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

- a. By dividing the list into halves
- b. By sorting the list first
- c. By comparing each element in the list sequentially ✓
- d. By using a hash function

Question **3**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

- a. Sorting the list before searching
- b. Checking each element sequentially ✓
- c. Skipping every second element
- d. Dividing the list in half repeatedly

Question **4**

Correct

Mark 1.00 out of 1.00

In binary search, how is the middle element determined?

a. By using a hash function
b. By starting from the first element
c. By comparing each element sequentially
d. By dividing the list length by two ✓

Question **5**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. There must be a mechanism to delete and/or insert elements in the list ✓
b. Number values should only be present

Number values should only be present

c. There should be direct access to the middle element in any sublist
d. The list must be sorted

Question **6**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

a. The search continues in the right sublist
b. The search ends successfully ✓
c. The list is sorted
d. The search continues in the left sublist

Question **7**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

a. O(n log n)
b. O(1) ✓
c. O👎
d. O(log n)

Question **8**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Jump search
b. Hashing
c. Linear search ✓
d. Binary search

Question **9**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

a. The list is sorted
b. The search continues in the left or right sublist ✓
c. The search continues from the beginning
d. The search stops

Question **10**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. The last element is returned
b. The search is considered unsuccessful ✓
c. The first element is returned
d. An error is raised

Question **11**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

a. Complexity

b. Selection

c. Insertion

d. Bubble ✓

Question **12**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. n-1
b. n ✓
c. log n
d. n/2

Question **13**

Incorrect

Mark 0.00 out of 1.00

Which of the following is a conventional searching technique?

a. Linear search
b. Dynamic search
c. Binary search ✗
d. Hashing

Question **14**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the right sublist
b. In the left sublist ✓
c. At the beginning of the list
d. In the entire list

Question **15**

Correct

Mark 1.00 out of 1.00

In a linear search, how many comparisons are made in the worst-case scenario to find an element in a list of size n?

a. log n
b. n/2
c. n ✓
d. 1
